Build a Basic Marketing Funnel

Product: StudyNest - AI Study Planner App for College Students
Track: Digital Marketing | **Submitted by:** Reddi Malli Nandini
Tools: Canva, Google Docs

1. Objective

To understand the marketing funnel and customer journey by designing a complete path - Awareness, Consideration and Conversion - for a selected product, with a distinct audience definition, content plan and call-to-action at each stage.

2. Product Overview

StudyNest is a sample freemium app that turns a student's syllabus and exam dates into a personalised day-by-day study plan. Key features: AI timetable generator, Pomodoro focus timer, syllabus progress tracker and smart revision reminders. Pricing: Free plan + StudyNest Pro at Rs. 49/month (student offer; Rs. 99 regular). USP: *"Upload your syllabus, get a plan in 30 seconds."*

3. Target Persona

Rahul, 20 - 3rd-year B.Tech student. Wants to clear all subjects and keep a good CGPA. Struggles with late starts, a large syllabus and phone distractions. Spends time on Instagram Reels, YouTube and WhatsApp/Telegram class groups. Price-sensitive, trusts peers and needs to try before paying. Strongest trigger: 2-3 weeks before exams.

4. Marketing Funnel Diagram

5. Audience Stage Definitions

Stage	Who they are	Mindset	Channels	Goal
Awareness	Stressed students who don't know a tool can help; scrolling, not searching	"Why can I never finish the syllabus on time?"	Reels, Shorts, meme pages, campus ambassadors, influencers	Reach & brand recall
Consideration	Students who engaged with us and are comparing study methods/apps	"Will this actually work for me?"	YouTube, carousels, landing page, retargeting, email	Trust; free installs & sign-ups
Conversion	Active free users with exams approaching who haven't upgraded	"Is Pro worth it? Can I wait?"	In-app, push, email, WhatsApp, retargeting ads	Free to paid conversions

6. Content for Each Stage

Awareness - talk about the problem, not the product

Format	Content idea	Platform
Reel (15s)	"POV: It's 2 AM before the exam and you just opened the syllabus" - meme ending with logo	Instagram
YouTube Short	"3 reasons you forget what you studied (and how toppers fix it)"	YouTube
Meme carousel	"Types of students during exam week"	Instagram
Infographic	"The 25-minute rule: how Pomodoro doubles focus"	Instagram / LinkedIn
Campus activity	"Study Streak Challenge" posters with QR code at fests	Offline
Influencer collab	Study/engineering micro-creators share their exam routine	Instagram / YouTube

Consideration - show how the product solves the problem

Format	Content idea	Platform
Demo video	"I uploaded my syllabus and StudyNest planned my semester in 30 seconds"	Instagram / YouTube
Comparison carousel	Paper planner vs Notion vs StudyNest - setup time, reminders, auto re-planning	Instagram / LinkedIn
Lead magnet	Free PDF: "30-Day Exam Prep Planner for Engineering Students"	Landing page
Testimonials	Short video reviews from student users	Instagram / Website
SEO blog	"How to make a study timetable for semester exams (free template)"	Website / Google
Email sequence	Tips, app walkthrough, success story (after PDF download)	Email

Conversion - give a reason to act now

Format	Content idea	Platform
In-app banner	"Exams in 14 days - unlock AI revision mode with Pro"	App
Push notification	"Your 7-day free Pro trial is waiting. No card needed."	App
Offer creative	Exam Season Offer: Rs. 49/month (50% off), countdown timer	Instagram / WhatsApp
Personalised email	"You've studied 12 hours with StudyNest. Here's what Pro adds..."	Email
Retargeting ad	Shown to free users who visited pricing but didn't buy	Meta Ads
Trust content	FAQ: cancel anytime, secure UPI payment, 4.6-star student rating	Pricing page

7. CTA for Each Stage

Stage	Primary CTA	Secondary CTA	Commitment
Awareness	Follow @studynest for daily study hacks	Tag a friend / Save for exam week	Low
Consideration	Download StudyNest free	Get the free 30-Day Planner PDF / Watch demo	Medium
Conversion	Start your 7-day free Pro trial	Upgrade at Rs. 49/month - offer ends Sunday	High

8. Message Progression

As the hint advises, the same message is not repeated across stages. Each stage answers a different customer question:

Stage	Customer's question	Our message	Tone
Awareness	Why do I always struggle before exams?	Exam stress is a planning problem, not a you problem.	Relatable, funny
Consideration	How can I fix it?	StudyNest builds your study plan in 30 seconds - see how.	Helpful, proof-based
Conversion	Why should I pay now?	Unlock Pro before your exams - free for 7 days.	Direct, urgent

9. KPIs & Measurement

Stage	KPIs	Monthly target	Tool
Awareness	Reach, views, follower growth, shares	50,000 reach; 1,500 followers	Instagram / YouTube Insights
Consideration	CTR, PDF downloads, installs	3% CTR; 2,500 installs	Google Analytics, UTM, Play Console
Conversion	Trial starts, free-to-paid rate, CPA	8% conversion; CPA under Rs. 60	In-app analytics, payments

Funnel math: 50,000 reached → 2,500 installs (5%) → 200 Pro users (8%) → approx. Rs. 9,800/month new revenue.

10. Sample 4-Week Content Calendar

Week	Focus	Mon	Wed	Fri	Sun
1	Awareness	Exam meme Reel	Pomodoro infographic	Influencer collab	Student types carousel
2	Aware. to Consid.	App demo video	Comparison carousel	Free PDF launch	Testimonial
3	Consideration	SEO blog	Emails 1-2	Live Q&A	Retargeting starts
4	Conversion	Offer launch	Push + banner	Usage-stats email	Last 24 hours reminder

11. Bonus: Retention

Weekly progress reports, streak badges and a referral offer ("Refer a friend - both get 1 month of Pro free") keep subscribers renewing. KPIs: renewal rate, referrals per user.

12. Conclusion & Key Learnings

A funnel is a conversation, not a single ad. Commitment should rise gradually - follow, free download, then paid plan - and each stage needs its own message because the customer is in a different state of mind. Clear KPIs at every stage reveal where users drop off. For a student product, the exam calendar is the strongest conversion trigger. The overall flow is: **Entertain** → **Educate** → **Offer**.
